

# GRASS MAT TILES

## SURFACING BENEFITS INCLUDE:

- Installed on to natural grass
- Retains areas natural appearance
- High ground drainage
- Resistant to ignition, slipping and abrasion
- Highly durable & hard wearing

## COMMON USES INCLUDE:

- Play area safety surfacing
- Pathways and rural areas
- Ground reinforcement

## OTHER FEATURES INCLUDE:

- No base works required
- Certified to EN1177

 SAFETY SURFACE

Grass mat tiles safety surfacing is particularly popular and commonly found in playgrounds and outdoor play spaces as an extremely cost effective safety surface. After the matting has been installed grass will begin to grow through the holes which in time can hide the mats almost entirely. This enables protection against injuries that could occur from a trip or fall while also maintaining the natural look of the outdoor area. Ground reinforcement mesh can be laid under the grass mats to provide additional strength and stability.

\* Note: Sample pictures are for reference only.

- Grass mat tiles are recommended to be installed onto a good grass sward. Topsoil, seed / turf may be required prior / during grass mat installation. Ground reinforcement mesh may also be required.  
- Grass mat tile specification dependent upon the CFH of the equipment it is installed beneath.
