

**SURFACING BENEFITS INCLUDE:**

- Wide range of colours available
- Themed designs can be incorporated
- Fully porous and fast draining
- Accessible surface, wheelchair and pram safe
- Resistant to ignition, slipping and abrasion
- Ideal for existing tarmac and concrete surfaces
- Low maintenance and hard wearing

**COMMON USES INCLUDE:**

- Play area safety surfacing
- Pathways and trackways
- Sport and games areas

**OTHER FEATURES INCLUDE:**

- 2D & 3D graphics
- 50/50 Fleck black and colour option
- Certified to EN1177

Colour Option  
Examples

Wetpour safety surfacing combines rubber granules with flexible binders to create a durable bound surface that offers protection against injuries that could occur from a trip or fall. The extensive range of colours available enables bold and vibrant finishes to be created that often include bespoke graphics, allowing the surface to complement the overall design and add themeing to the play space. This makes an exciting and imaginative surface for children's playgrounds.

✓ SAFETY SURFACE

\* Note: Sample pictures are for reference only and that colour laid may vary due to batch variation, supplier variation and environmental factors. Some colours subject to fade over time from exposure to UV light.

- Safety surfaces may require to be laid at various depths depending upon the CFH of the equipment it is installed beneath.  
- Wetpour safety surface can be laid onto a variety of sub-bases. The most common of these being type 1 MOT stone, tarmac or concrete.
